LANGUAGE CODES

Each name (except the name in English) is accompanied by a language code (between brackets). This tells you the language in which the name is put. The codes are those of the international standard code system ISO-639-3 (see: https://iso639-3.sil.org/code_tables/639/data/all)
Below you will find a two-way list to those language codes (in case a language has no official ISO code, the full name of the language is used instead; * indicates a ISO-639-2-code).

AAT: Arva
ABQ: Abaza
ADY: Adyghe
Adyghe: ADY
Aghul: AGX
AGX: Aghul
AII: (Assyrian) Neo-Aramaic
